Yep. Me too.

Ben and I tried it in my cube just before the briefing and it worked fine. I wonder if I accidentally turned it off?

Hey Mark, can you send me a copy of the final presentation? I don't know why those pop ups didn't work and I'd like to figure out what happened.

Thanks,

Stephen

Thanks Stephen, Anna,

The slides look good. I have incorporated them into the presentation.

Hey Mark, I've made those three red boxes into pop ups and deleted the rest. If you want more

popups or if you want the other boxes back just let me know. The effects are active only in presentation mode. To trigger the boxes on and off you need to click on the mine icons for Section 25, Cliffside and Sandstone Mines. If you click anywhere else on the screen it will take you to the next slide. I tried to sharpen up the aerial photo though I'm not sure if I made it any better. Anna, can you make the photo look better?

Thanks,

Stephen

I'll get right on it. I'll also work on sharpening up the aerial photo but can't promise anything.

Just have the pop up boxes for those shown with red border. Delete all the other boxes of info

Thanks,

Mark Purcell
